June 14, 2013

Dear Customer:

Enclosed in this package, please find ND SW Release 18.4 Production Version providing support for our new Intel® Ethernet Connection I218 (Clarkville). Clarkville is the Intel Ethernet PHY that aligns with Shark Bay Corporate ULT Client Platforms. This drop also includes selected bug fixes.

Version V18.4C00083 TIC: 307022

This is a PV build of this driver release.

Components are feature complete and there are no known issues being addressed by engineering.

Use of this software and any accompanying documentation (collectively the "Software") is subject to the terms of the Intel Software License Agreement included on this CD. By installing or using the Software, you agree to the terms of the Agreement. If you do not wish to so agree, do not install or use the Software.

If you discover any issues during your testing, please enter them into IPS, Intel Premier Support or contact your Intel technical representative. This will allow us to track and coordinate issues more effectively. The earlier these issues are raised, the easier they are to address in the next release. We look forward to hearing from you.

Best Regards,

Intel ND OEM Product Marketing Team
