

# IPC-6806

支持全尺寸/半尺寸插槽SBC的6槽紧凑型桌面/壁挂式机箱

## 特性

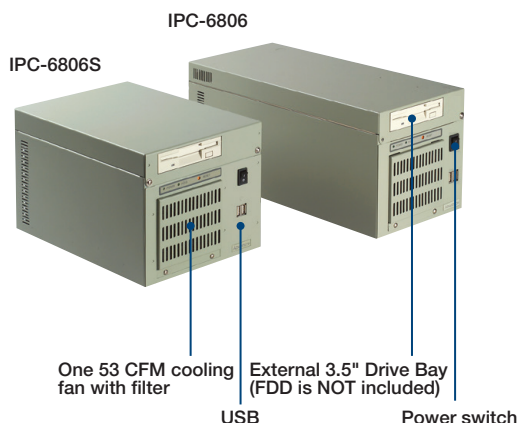

- 三种不同尺寸型号，适用于各类工业应用
  - IPC-6806S 支持6槽PICMG 1.0/1.3背板
  - IPC-6806 支持6槽PICMG 1.0背板
  - IPC-6806W 支持6槽PICMG 1.0/1.3背板
- 支持6槽背板
- 流线型过滤气流设计

CE FCC

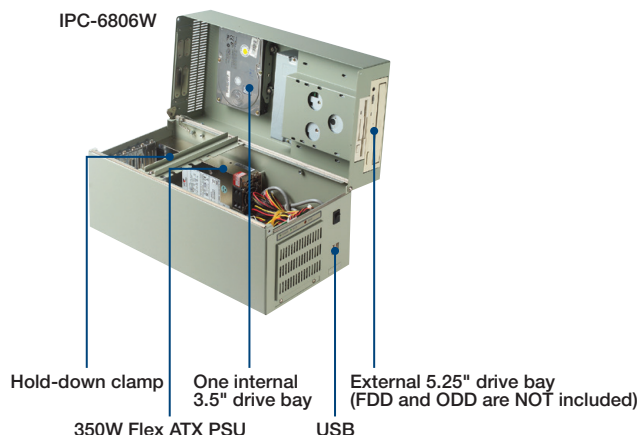

## 规格

| 型号名      |                   | IPC-6806S                                     | IPC-6806                                       | IPC-6806W                                    |
|----------|-------------------|-----------------------------------------------|------------------------------------------------|----------------------------------------------|
| CPU卡板型   |                   | Half-size PICMG 1.0/1.3                       | Full-size PICMG 1.0                            | Full-size PICMG 1.0/1.3                      |
| 硬盘位      | 5.25"             | -                                             | -                                              | 1                                            |
|          | External 3.5"     | 1 (no support for IPC-DT-3120E)               | 1                                              | 1                                            |
|          | Internal 3.5"     | 1                                             | 1                                              | 1                                            |
| 散热       | 风扇                | 1 (9cm / 51.5 CFM)                            | 1 (9cm / 51.5 CFM)                             | 1 (9cm / 58 CFM)                             |
|          | 空气滤网              | Yes                                           | Yes                                            | Yes                                          |
| 前面板I/O接口 |                   | USB 2.0                                       | 2                                              | 2                                            |
| 其他       | LED指示灯            | Power and HDD                                 |                                                |                                              |
|          | 控制                | Power switch and system reset buttons         |                                                |                                              |
| 工作环境     |                   | Operating                                     |                                                | Non-Operating                                |
|          | 工作温度              | 0 ~ 40 °C (32 ~ 104 °F)                       |                                                | -20 ~ 60 °C (-4 ~ 140 °F)                    |
|          | 工作湿度              | 10 ~ 85% @ 40 °C, 非冷凝                         |                                                | 10 ~ 95% @ 40 °C, non-condensing             |
|          | 振动 ( 5 ~ 500 Hz ) | 0.5 Grms                                      |                                                | 2 G                                          |
|          | 冲击                | 10 G (with 11 ms duration, half sine wave)    |                                                |                                              |
| 物理特性     | 尺寸 (宽 × 高 × 深)    | 191 x 178 x 290 mm<br>(7.5" x 7.01" x 11.42") | 166 x 178 x 398 mm<br>(6.54" x 7.01" x 15.67") | 198 x 221 x 398 mm<br>(7.8" x 8.7" x 15.67") |
|          | 重量                | 5.6 ka (12.3 lb)                              | 6.3 ka (13.9 lb)                               | 8 ka (17.6 lb)                               |
